

THE BEST-EQUIPPED HOSPITALS IN LATIN AMERICA

— 2017 —

ABOUT GLOBAL HEALTH INTELLIGENCE

Global Health Intelligence provides detailed information on healthcare infrastructure in emerging markets in order to help clients understand the competitive landscape and identify opportunities for growth.

Founded on over 20 years of research expertise in emerging markets, Global Health Intelligence has developed the world's largest hospital demographics database focused on Latin America.

HOSPITAL DATABASE CHARACTERISTICS

ABOUT THE RANKING

Global Health Intelligence (GHI) has the world's largest database of Latin American hospitals, offering more than 130 data points per hospital and covering 86% of the hospitals in the region.

This report offers a ranking of the best-equipped hospitals in Latin American markets, notably those in Brazil, Mexico, Colombia, Argentina and Chile. The ranking for these hospitals is according to 4 different categories

BEST EQUIPPED FOR HOSTING PATIENTS
TOP HOSPITALS FOR ACCOMMODATING NEWBORNS
MOST DIAGNOSTIC IMAGING EQUIPMENT
HIGHEST FOCUS ON CARDIOVASCULAR HEALTH

The ranking is based on hard data of the installed base. Given the vast differences (such as population, needs, resources, etc.) that exist between markets, the ranking was developed to identify the top hospitals within each country. For example, the largest hospitals in Brazil tend to be much larger than the largest hospitals in Peru, yet institutions in both countries could be considered to be well-equipped as per the specific needs of their respective markets.

In addition to a regional overview, specific country reports on hospitals rankings are available to the press. Please contact GHI directly to obtain them.

DISCLAIMER

The Global Health Intelligence (GHI) ranking is based on metrics derived from GHI's hospital demographics database. These rankings are provided without warranties of any kind, whether express or implied, including, but not limited to, implied warranties of success, quality for a particular purpose, non-infringement or course of performance. Despite our research and analysis, the hospital rankings should be considered to be strictly subjective opinions.

Users of the rankings hereby acknowledge and agree to perform their own due diligence in order to come to well-informed decisions of their own. The Users hereby acknowledge that the rankings may possibly be used as an instrument in making such a decision, but should not be viewed as an authoritative end-all to any evaluations. GHI cannot be held responsible for any choices that individuals make regarding their care based on this ranking. The data used by GHI was obtained from the various institutions on a voluntary basis in 2015, 2016 and 2017. Some institutions decided not to disclose information and are therefore absent from the ranking.

GHI is not responsible for the accuracy of the information provided nor legally liable should any of it prove to be incorrect. Because the ranking created by GHI is an opinion, GHI is not legally responsible for any effect this ranking may have on the reputation of any healthcare institution in Latin America, whether or not it is included in the ranking. This applies to any hospital, clinic, medical center or any other type of healthcare facility.
