

The Best-Equipped Private Hospitals in Latin America 2022

Developed by:

About This Ranking

This ranking of Latin American private hospitals was created by Global Health Intelligence (GHI), the world's leading healthcare data analytics company for Latin America. It is powered by data from HospiScope, the world's largest database of Latin American hospitals, which offers more than 140 data points per hospital and covers nearly 90% of the hospitals in the region. Global Health Intelligence created HospiScope in 2014 and its team of researchers continually updates and expands the data found in it. Sales, business intelligence and marketing teams use HospiScope to identify sales opportunities.

Covering 7 hospital markets in Latin America, including all of the largest ones (e.g. Argentina, Brazil, Colombia and Mexico), this ranking of private hospitals was created according to 4 key categories:

- Best Equipped for Hosting Patients
- Highest Count of Basic Surgical Equipment
- Best-Equipped Hospitals for Advanced Diagnostic Imaging
- Best-Equipped Hospitals for High-Risk Patients

Why We Developed This Ranking

This ranking was developed for a special issue of the magazine El Hospital. GHI shared the results of the ranking in a webinar in Q4 2021 and now makes them available for a wider audience.

The ranking is by no means exhaustive; it offers insights into the types of key medical equipment and technology that are available in Latin America's private hospitals. Until now, such information was not readily available. As a company, GHI previously developed HospiRank, a broader annual ranking of the best-equipped hospitals in Latin America. Given the size difference between public and private hospitals in Latin America, a separate ranking for private hospitals can afford more direct comparisons.

While patients and healthcare professionals may find useful information in this ranking, it may be most helpful for medical equipment and device manufacturers, as it offers this audience additional data they can compare to their own internal sources in order to understand the market and the opportunities, especially as demand for equipment begins to increase in 2022 and beyond.

About Global Health Intelligence

Global Health Intelligence provides detailed information on healthcare infrastructure in emerging markets in order to help clients understand the competitive landscape and identify opportunities for growth.

SurgiScope

This database tracks medical procedures performed in Latin American hospitals. Hospital administrators can use SurgiScope to see the procedures most performed and how their hospitals or clinics compare to others in their countries in this respect. Pharmaceutical companies and medical equipment manufacturers can use SurgiScope to gauge market demand for their products in hospitals, as well as generate direct sales opportunities.

HospiScope

A Latin American hospitals demographics database covering 140+ points per hospital, including installed base of capital equipment, beds and staff. Offering detailed data on hospitals in 17 countries, HospiScope covers nearly 90% of the medical facilities in the region. HospiScope is your solution to identifying growth opportunities in Latin America.

ShareScope

Featuring detailed data on market size/share for a wide range of medical equipment and devices across the region, ShareScope is designed to give manufacturers an accurate picture of the competitive marketplace. Driven by a four-step gate methodology, ShareScope features analysis on capital equipment (such as X-ray machines, CT scanners, MRI machines, etc.); medical devices (pacemakers, stents, surgical equipment, etc.); medical technologies (PACS, RIS, etc.); consumables (adhesives, disposable clothing, surgical kits, etc.) and pharmaceuticals.

In-Scope

This service provides customized research to help device and equipment manufacturers gain a more thorough, granular understanding of the marketplace, as well as competitive intelligence to help them counteract competitors successfully.

LatAm Hospital Monitoring Service

Subscribers to this service receive weekly updates with the latest information on Latin American hospitals in their markets of choice, allowing them to see fresh developments in equipment demand, surgical procedures and more. They access the data and view using a powerful business intelligence platform that delivers superior data visualization that provides rapid yet detailed insights.

Hospicheck

This unique platform allows hospital administrators to introduce their institution's medical equipment count and technology usage information, then receive a customized report that shows how their specific hospital compares to the benchmark for all hospitals in their country. Administrators can generate reports comparing their hospitals to all hospitals in their country or just to either public or private hospitals in their country, allowing for direct comparisons. This is the first — and only — online tool that provides hospital administrators with an objective, data-driven understanding of how their institution compares to other hospitals in their country — as well as in other countries of Latin America.

Disclaimer

These Latin American private hospital rankings are based on metrics derived from HospiScope, the Latin American hospital demographics database created by Global Health Intelligence (GHI). These rankings are provided without warranties of any kind, whether express or implied, including, but not limited to, implied warranties of success, quality for a particular purpose, noninfringement or course of performance. Despite our research and analysis, these private hospital rankings should be considered to be strictly subjective opinions.

Users of these rankings hereby acknowledge and agree to perform their own due diligence in order to come to well-informed decisions of their own. The users hereby acknowledge that these LatAm private hospital rankings may possibly be used as an instrument in making such a decision but should not be viewed as an authoritative end-all to any evaluations. GHI cannot be held responsible for any choices that individuals make regarding their care based on these Latin American private hospital rankings.

The data used by GHI was obtained from the various institutions on a voluntary basis in 2019, 2020 and 2021. Some institutions decided not to disclose information and are therefore absent from these rankings. GHI is not responsible for the accuracy of the information provided nor legally liable should any of it prove to be incorrect. Because the private hospital rankings created by GHI are opinions, GHI is not legally responsible for any effect these rankings may have on the reputation of any healthcare institution in Latin America, whether or not it is included in the ranking. This applies to any hospital, clinic, medical center or any other type of healthcare facility.
